IBC CRYSTAL PROTECTOR

AdBlue anti-crystallising agent in a format suitable for 1000L containers

TW Automotive Aftermarket
Europe #WeTakeCareOfVehicles

Wynn's IBC Crystal Protector improves AdBlue® (DEF) atomisation and prevents crystal formation whilst optimising performance of the SCR system.

- Improves the atomisation of AdBlue® into the SCR System
- Improves SCR/AdBlue® operation
- Prevents the formation of crystals on components in the AdBlue® system
- Ensures efficient NOx reduction and lower emissions
- Prevents SCR blockages and crystal blockages
- Prevents vehicle breakdown
- Prolongs the life of components in the AdBlue system

Applications:

- Add 2 liters to one IBC of AdBlue
- Compatible with all Diesel engines with SCR (AdBlue system) and with all Diesel Exhaust (DEF)/AdBlue fluids
- Only add to IBC's of AdBlue. Do not add to diesel fuel.
